

6516206297.txt

It is rare when a quality service is offered as part of a larger program. By offering up to date weather and traffic, and their musical selection, XM radio has shown itself to be aware the needs of the the community and of its subscribers. As one of the millions of paying customors of XM radio, I feel I should have the right to decide what station to turn to for weather and traffic information. I hope that you will allow XM satelite radio to continue to provide not only its quality music, but weather and traffic information also.

Thank You
